Personalisation:	Not carried out at this site		
Management of PKI certificates:	Not carried out at this site

Notes & Exclusions:	STC works with a technology partner to generate data for personalisation of eUICCs. STC has not been audited for, and does not directly conduct, generation of eUICC personalisation data. However, failure or manipulation of systems at STC's premises (and managed under STC's control), could result in SAS-UP principles being undermined (for example, resulting in duplicate production). The SAS-UP certification of this site is, therefore, fundamental to the integrity of the production chain and must be maintained if the resulting eUICCs are to be part of the GSMA PKI ecosystem.
